Performance score.

Image elements do not have explicit width and height

Serve static assets with an efficient cache policy — 2 resources found

Avoid enormous network payloads — Total size was 3,143 KiB

Diagnostics — More information about the performance of your application. These numbers don't directly affect the

 Avoid chaining critical requests — 11 chains found 	~
 Keep request counts low and transfer sizes small — 25 requests • 3,143 KiB 	~
■ Largest Contentful Paint element — 1 element found	~
Avoid large layout shifts — 5 elements found	~
Avoid long main-thread tasks — 1 long task found	~
Avoid non-composited animations — 1 animated element found	~
Passed audits (26)	~

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

	Buttons do not have an accessible name	~
	Links do not have a discernible name	~
Na	vigation — These are opportunities to improve keyboard navigation in your application.	
A	Heading elements are not in a sequentially-descending order	~
	ditional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn re in our guide on conducting an accessibility review.	~
